

We support promptly to get the Certification for US Export

Field Evaluation Service

IAS Accredited, NFPA 790/791 For On-Site Field Evaluation/Product Labeling

We are Technical associate of IAS FEB 110 Accredited Field Evaluations help regulatory authorities (known as AHJ's – Authorities having jurisdiction) determine the compliance of a product, leading to "approval" of the installation. Our evaluation process consists of documentation review, visual and mechanical inspection, suitability for installation in accordance with the adopted installation Code(s) such as the National Electrical Code, applicable testing and an engineering report. Our US partner's Field Evaluation Services can be requested by anyone involved with the product, including business owners, manufacturers and contractors. Our Field Evaluation Product Label will be applied immediately if the product complies with the applicable requirements. If the product does not meet the requirements, we will provide you with a detailed finding report and then provide the support needed to bring the product into compliance.

Our Field Evaluation Service Engineers are available throughout the USA, Canada, Europe and Asia and specialize in a number of products, including but not limited to:

- Power distribution equipment/ Control Panels
- Solar installations and retrofits
- Industrial control/utilization equipment
- Factory utilization/automation equipment
- Commercial utilization equipment and appliances
- Lighting fixtures (luminaires) and signs
- ITE, medical, dental, and laboratory equipment

Our Vision:

We makes the world a safer place

Our Mission:

We safeguards products and systems, by supplying efficient third-party compliance and market access solutions.

We are positioned to effectively and efficiently serve your testing and certification needs.
